

The Power of Adhesive Information

Cyberbond Cyano off ! 505 CURED ADHESIVE REMOVER

Application:

Use to Remove cured or uncured cyanoacrylate adhesive from aluminum and metal frame non-flammable
Water cleanup

Direction for Use:

NOTE : CYANO-OFF! 505 Adhesive Remover is designed for use in either a tank or tray. CYANO-OFF! 505 can be reused again and again after filtering old residue from the product through a paint filter.

1. Cover the frame to be stripped in CYANO-OFF!505 solution.
2. Let frame soak until the old cured adhesive falls off.
3. Remove time depended on the frame. Thin layer of old adhesive will take 30 minutes. Heavier build-ups will take longer. If the CYANO-OFF! 505 solution is heated it will work faster. Ultrasonic bath also work very rapidly in removal.

CAUTION

1. Exposure may cause mild eye and skin irritation. If swallowed, including vomiting, and obtain medical attention immediately.
2. Use only with adequate ventilation.
3. Product may contain less than 1% VOC (Volatile Organic Compound). In case of eye or body contact, flush with plenty of water. Always read material safety data sheet before using product.
4. CYANO-OFF! 505 is bio-degradable, we recommend you consult your local governmental regulation for proper disposal.
